Profile Summary

Adaptable Full Stack Developer currently a Junior Frontend Developer at Hyovis Technologies and Water Systems, formerly a Full Stack Intern. Passionate about writing clean, maintainable code and efficiently delivering innovative, user-focused solutions.

Experience

Python Full Stack Developer Intern

Techolas Technologies, Calicut, Kerala
June 2023 - Feb 2024

- Developed full-stack projects using Python, Django, React.js, and REST APIs.
- Built AntiQuin, a responsive e-commerce website with features like cart, order management, favorites, search, filtering, and user account handling via Django's built-in features. Admin interface included order and user management tools.
- Created a Netflix Clone UI with React.js, using the TMDB API and Axios for data fetching.
- Collaborated in cross-functional teams to deliver robust and scalable web solutions.

Junior Front end Developer

Hyovis Technologies and Water Systems, Alappuzha, Kerala
Dec 2024 - Present

- Contributed to multiple live Django-based projects, focusing on frontend design and development.
- Designed and deployed company websites, including Hyovis Technologies, Machli Tech, and The Deep Seafood Company — all live and fully responsive.
- Provided minor backend support, working alongside Django developers to ensure seamless integration and functionality.
- Focused on clean UI/UX, responsive layouts, and performance optimization.
